

KAUSTUBH MUDE

Aspiring Data Scientist & Data Analyst

Nagpur, Maharashtra | +91 9309573024 | kaustubhmude@05gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

B.Tech Information Technology graduate with a strong interest in Data Science and Analytics. Skilled in Python, SQL, Power BI, Excel, data preprocessing, exploratory data analysis, data visualization, and machine learning. Experienced in working with datasets to identify patterns, generate insights, and develop predictive models. Completed hands-on academic and internship projects involving data analysis and machine learning. Seeking an entry-level Data Science & Analytics role to apply analytical skills and contribute to data-driven business solutions.

WORK EXPERIENCE

Data Science Intern | Hisan Lab Pvt. Ltd.

Feb. 2026 - July 2026

Roles & Responsibilities:

- Assisted in data cleaning, preprocessing, and validation to improve data quality and ensure accurate analysis.
- Developed interactive Power BI dashboards and reports to visualize key business metrics and support decision-making.
- Utilized Microsoft Excel (Pivot Tables, VLOOKUP, and formulas) to organize, analyze, and summarize large datasets.
- Created data visualizations using Power BI and Matplotlib to identify trends, patterns, and actionable insights.
- Collaborated with the team to transform raw data into meaningful reports, enabling data-driven business decisions.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Science & Analytics: Data Preprocessing, EDA, Feature Engineering, Data Wrangling, Statistical Analysis, Visualization

Machine Learning: Classification, Regression, Clustering (K-Means), Supervised & Unsupervised Learning

Deep Learning & Computer Vision: CNN, LSTM, Neural Networks, TensorFlow, Keras, ResNet

Libraries: NumPy, Pandas, Scikit-Learn, TensorFlow, Keras, Plotly, Matplotlib, Seaborn,

Frameworks: Streamlit, Flask

Tools & Databases: MySQL, GitHub, Jupyter Notebook, VS Code, Power BI

PROJECTS

Car Price Prediction

- Built a machine learning regression model to estimate used car prices using Python and Scikit-learn.
- Applied data preprocessing techniques, including missing value handling, feature encoding, and scaling.
- Compared multiple regression models and selected the best-performing model using evaluation metrics.
- Improved model accuracy through feature engineering and hyperparameter tuning.
- Integrated the model with Flask to enable real-time price prediction via a web application.

Technologies: Python, Scikit-learn, Pandas, Flask, Jupyter Notebook

Customer Shopping Analysis

- Analyzed 3,900+ customer transactions using Python, PostgreSQL, and Power BI.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) using Pandas.
- Developed SQL queries to analyze customer behavior, revenue trends, and product performance.
- Built an interactive Power BI dashboard to visualize KPIs and business insights.
- Generated data-driven recommendations to improve customer retention and business growth.

Technologies: Python, MySQL, Power BI, Jupyter Notebook

EDUCATION

Kavikulguru Institute of Technology and Science

Bachelor of Technology in Information Technology (CGPA : 6.5)

Ramtek

Nov. 2022 – July 2026
